WORK EXPERIENCE

Full-Stack Developer

Nov 2022 – Nov 2023

SeeMyApps, Saint-Laurent, QC

Startup specializing in online customer engagement and CMS services for businesses.

- Built a prototype SAAS application from the ground up in Angular and .NET.
- Revamped the look and feel of multiple company services in both Ionic and Material.
- Integrated a Google Actions Center API into existing company software.

Software Developer

Apr 2022 – Jun 2022

MindGeek, Montreal, QC

Collaborated with an agile team of ten to implement and fix various features on multiple company services. Laid off along with 125 employees following the resignation of the CEO and COO.

- Helped design a custom API to track various information for a company service (phone numbers, messages, api keys and requests, etc)
 - Setting up various crud pages within the admin portal.
 - Middleware error handling and api request throttling.
 - Implementing user roles and permissions.
- Updated incorrect database values in the development team company portal.

Computer Technician

May 2020 – Feb 2021

Private Client, Saint-Laurent, QC

Built, maintained and managed hundreds of computers for cryptocurrency mining.

- Installed and replaced all necessary hardware (CPU, GPU, RAM, etc)
- Ensured all drivers, operating systems and software were up to date.

Junior Web Developer

Jan 2020 – Apr 2020

SignatureWEB, Dorval, QC

Worked on two client websites during a four month internship.

- Updated the functionality on a real estate company's new website.
 - Connected frontend to ExpressionEngine CMS.
 - Created image carousel.
 - Implemented OpenStreetMap API.
- Assisted in the backend development of a Basketball league website tracking statistics.
 - Worked on a custom leaderboard API to calculate various stats for match and tournament data.
 - Created filters for the leaderboard.
 - Implemented sending invitation emails.
